**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Continued Prosecution Application***

The request filed on June 21, 2001 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/324,271 is acceptable and a CPA has been established. An action on the CPA follows.

***Information Disclosure Statement***

References that have not been considered on the PTO-1449 have already been considered previously in the parent application.

***Specification***

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner to facilitate the prosecution of this application.

***Claim Rejections - 35 USC § 102***

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claim Rejections - 35 USC § 103***

Art Unit: 1755

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicants are advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-12 are rejected under 35 U.S.C. 102(b) or 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Abstract of JP 4,315,632 (102(b)), EP 0,862,947 (102(a)) (see the search report), EP 0,755,716 (102(a)) (see the search report), U.S. Patent No. 5,498,583 to Le-Khac (102(b)) (see column 5), U.S. Patent No. 3,427,256 to Milgrom (102(b)) (see column 12) or WO 99/19063 102(a)) (see the search report).

Art Unit: 1755

These references are considered to anticipate the instant claims because they employ substances that can more or less be considered surfactants, namely, solid surfactants such as silica gel, polyethers, polyethylene glycol ethers or functionalized polymers. Accordingly, the claimed features of the final catalyst products produced by the references would inherently be expected to be the same as those claimed herein by applicants since they also make the catalysts in the presence of surface-active substances.

Alternately, although the references differ from the claims in the failure to associate the criticality of the surfactant with the product produced, the claims would still have been obvious because the skilled artisan would be expected to produce the same product by selection of the surfactant material as taught by the reference disclosures.

Any minor differences in the limitations of the dependent claims have been considered. This statement is meant to include limitations such as obtaining a crystalline product which is something the skilled artisan is aware can be promoted by the technique selected to produce the final product, or the selection of the particular metal salt or organic complexing agent, and so forth. Accordingly, any such differences are deemed to be result-effective variables that one of ordinary skill in the art would be expected to manipulate to advantage. Additionally, such limitations can be considered to have been simply known as conventional to the artisan practicing in the art at the time the invention was made and/or were common practices which were so well known in the art that they would have been taken for granted. MPEP 706.02(a).

If applicants believe that one or more limitations are critical to the invention, then applicants should amend the claims to reflect such critical limitations as well as indicate where in the specification such critical limitations were discussed and demonstrated.

*Conclusion*

Applicants are advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to final rejection so as to be considered timely. It is anticipated that the next office action will be a final rejection.
